

2016 年度研究実績

Kusakari, K., Yokoyama, Y., Inomata, S., Gozu, Y., Katagiri, C., Sugimoto, Y.: The corrected structure of depressoside, an antioxidative iridoid glucosides extracted from the flowers of *Gentiana urnula* Harry Sm., *Natural Product Research*, 30 (8), 954-959, 2016. DOI:10.1080/14786419.2015.1085864.

Samejima, H., Mustafa A.E.L., Babiker, A.G.T., Sugimoto, Y.: Identification of *Striga hermonthica* resistant upland rice varieties in Sudan and their resistance phenotypes, *Frontiers in Plant Science* doi:10.3389/fpls.2016.00634, 2016.

Mikiko Kunishima, Yasuo Yamauchi, Masaharu Mizutani, Masaki Kuse, Hirosato Takikawa, Yukihiro Sugimoto: Identification of (Z)-3:(E)-2-hexenal isomerases essential to the production of the leaf aldehydes in plants, *J. Biol. Chem.* 291 (27), 14023-14033, 2016.

Samejima, H., Babiker, A.G.T., Hirosato Takikawa, Mitsuru Sasaki, Sugimoto, Y.: Practicality of suicidal germination induction for controlling *Striga hermonthica*, *Pest Management Science*, 72 (11), 2035-2042, 2016.

鮫島啓彰、滝川浩郷、杉本幸裕：根寄生雑草防除に向けた自殺発芽誘導剤の開発と実証試験、*バイオサイエンスとバイオインダストリー*、74 (4), 314-315, 2016.

杉本幸裕、滝川浩郷：根寄生雑草の潜在的危険性と生活環に着目した防除の試み、学術の動向、21 (8), 18-23, 2016.

杉本幸裕、米山弘一、特集ストリゴラクトン はじめに、植物の生長調節、51 (2), 88-90, 2016.

鮫島啓彰、滝川浩郷、杉本幸裕、根寄生雑草の生存戦略の化学的解明と防除への応用、関東雑草研究会報、27, 5-19, 2016.

Akane Kamiyama, Mado Nakajima, Liyou Han, Kei Wada, Masaharu Mizutani, Yukiko Tabuchi, Akiko Kojima-Yuasa, Isao Matsui-Yuasa, Hideyuki Suzuki, Keiichi Fukuyama, Bunta Watanabe, Jun Hiratake: Phosphonate-based irreversible inhibitors of human γ -glutamyl transpeptidase (GGT). GGsTop is a non-toxic and highly selective inhibitor with critical electrostatic interaction with an active-site residue Lys562 for enhanced inhibitory activity. *Bioorganic & Medicinal Chemistry* 24(21) 5340-5352 2016

河合洋介, 小埜栄一郎, 水谷正治: 2-オキシグルタル酸依存性ジオキシゲナーゼの多様性と進化 化学と生物 54(9) 640-649 2016 年 9 月

Naoyuki Umemoto, Masaru Nakayasu, Kiyoshi Ohyama, Mari Yotsu-Yamashita, Masaharu Mizutani, Hikaru Seki, Kazuki Saito, Toshiya Muranaka: Two Cytochrome P450 Monooxygenases Catalyze Early Hydroxylation Steps in the Potato Steroid Glycoalkaloid Biosynthetic Pathway. *PLANT PHYSIOLOGY* 171(4) 2458-2467 2016
