Our students joined the first session of Kobe University “Basic Sociology:What do you need to be a global person?” (Relay Lectures).

More than 200 university students joined the session. Our students was very active in the Q and A session. They were questioning the lecturers after the session.

From the student’s report:

- I will stop excusing myself saying that “I am still a teenager”. I will find what I can do and what I should do to make the world a better place.
- I was exactly thinking the same as Mr. Miwa said. “Self-establishment is more important than technical know-how and other languages”. I should be more confident and move on.
- It was impressing to learn that the difference between Global and International is coming from the borders.
- We should be aware that Globalization may make the originality of its country fade away. We should do something about it.
- The reason why we are losing Japaneseness is coming from the daily life.
