[Title] Introducing the disaster prevention game to elementary school.

[Overview] As this year's main activity, we are willing to do regional contribution activities. We visited Kobe City Uzugamori Elementary School to share what we learned from the Kobe-Sendai interaction program. Our students had a meeting with the teachers in charge of the disaster prevention and showed them the "disaster prevention game". We will play this game with the elementary school children in July.

Meeting with teachers in charge of disaster prevention.

We explained how the game works.

We actually played the game to show how it works.
