2016-Kobe University Relay Lectures-3rd

[Overview] Basic Sociology –What do you need to be a Global Person-

JAPIC, Planning and Coordination Division
Mr. Uemura Shunichi

Student's comments: Before this lecture, I was thinking that the most important thing to deal with globalization is English ability. Now I realized that the most important thing is to have my own way of thinking. Additionally, I realized that I should learn to respect the other religions and have a mind to consider others and to know more about my own country.

Ministry of Economy, Trade and Industry, Director of Industrial Science and Technology Policy and Environment Bureau - Mr. Hiroyuki Suematsu

Student's comments: "Agricultural crops and forests are the fruits of our predecessor's labor and we have to keep it for the next generation." This comment was made at the beginning of the lecture. I realized that these words sum up today's lecture.

Mayor of Kamaishi City Mr. Takenori Noda

Student's comments: We should continue to have connections with our neighbors. "What should we do to improve Japan's future?" - I would like to cooperate with my friends to find the answer to this question.
