Lecture about the GIS: Geographic Information System from Sotaro Tsuboi, Ph.D. at the Disaster Reduction and Human Renovation Institution

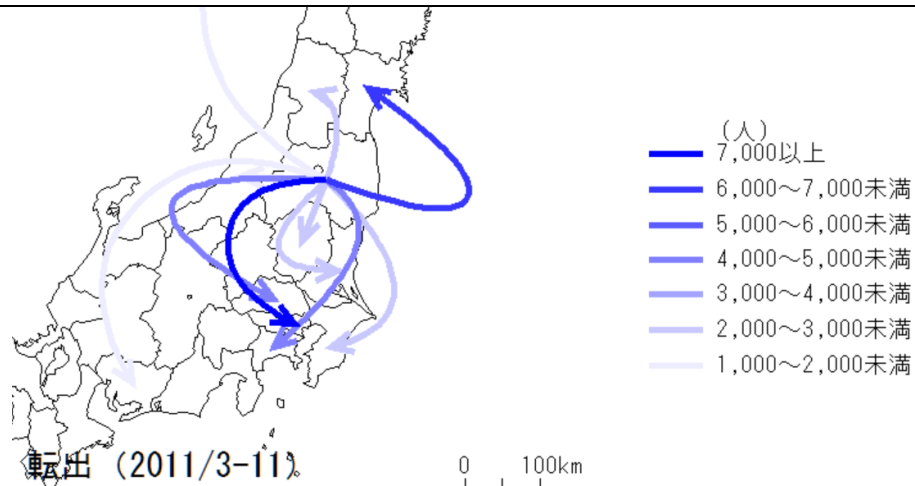

[Overview]
Tsuboi Sensei is doing research related to urban disaster prevention, urban geography, geographical education, socio-technical system at the Disaster Reduction and Human Renovation Institution.

He taught us about the basics of GIS and the points we should be aware of when doing the mapping.

Tsuboi-sensei found that the GIS was valuable at the time when the Kumamoto Earthquake happened during his fieldwork.

(Practice 1) Student's activity - Mapping the convenience stores in each prefectures.

(Practice 2) Student's activity - Mapping the emigration ratio_ Numbers of people whom moved out from Fukushima pref. after the Great East Japan Earthquake.
