

Mathematics and Science Koshien Junior 2nd Prize Winner

Outline : On August 19th (Fri), a team consisting of 2 students from 2nd Grade and 1 student from 1st Grade, participated in the “2017 Mathematics and Science Koshien Junior” held at the Kobe International Exhibition Hall. We won the 2nd Prize at the contest and will be participating in the “5th National Tournament of Science Koshien Junior” as a representative of Hyogo Prefecture.

(Impression from participated student)

Since there were so many teams when we arrived at the convention site, I didn't think that we would be able to become representatives of Hyogo Prefecture, not to mention receiving any prizes at all until the results were announced. However, as we kept solving the problems by putting our efforts together, I realized how good our teamwork was. I was very surprised when the prizes were announced and at the same time felt that we couldn't have won the prize if it were not for these 3 members. I hope that we can make most of our teamwork also at the national contest. (2nd Grade, Male)
